360° DETECTION AVAILABLE ONLY WITH UP4 DUAL

To ensure minimum visibility for all, whatever the time of day, while maximizing energy savings, Sunna Design offers an intelligent detection system.

Based on infrared motion sensors, it easily detects pedestrians, cyclists and slow-moving cars.

A solution that can achieve energy savings of up to 80% in low-traffic areas!

DATA SUPERVISION

SUNNAPP LOCAL POINT-TO-POINT MONITORING (included)

Install your street lights and interact with your products via long-range Bluetooth.

- Installation and commissioning support
- Tracking and performance history
- Registration and management of the park
- Management of lighting profiles

SMART ENERGY MANAGEMENT

Integrated into UP products, **SunnaCore** features advanced **autonomy management**, enabling the battery to provide **optimal service 365 nights a year**, even during periods of low solar irradiation.

CUSTOMIZED LIGHTING PROFILES

Our lighting profiles are optimized based on daily sunlight.

Based on previous days' weather data and the energy available in the battery, our system automatically regulates light intensity to prevent outages and optimize lighting availability.
